

# HR Analytics Executive Summary

This report provides a comprehensive breakdown of current workforce dynamics, focusing on attrition trends, demographic distributions, and job satisfaction levels.

The data represents a total workforce of **1,470 employees** with a current attrition rate of **16.12%**.

## 1. Key Performance Indicators (KPIs)

- Total Employee Count:** 1,470
- Total Attrition:** 237 employees have left the organization.
- Attrition Rate:** 16.12% (Requires monitoring against industry benchmarks).
- Current Active Workforce:** 1,233 employees.
- Average Age:** 37 years, indicating a mid-career, experienced workforce.

## 2. Departmental Attrition Breakdown

- R&D:** Highest volume of attrition at **56.12% (133 employees)**. This department is the primary driver of turnover.
- Sales:** Accounting for **38.82% (92 employees)** of total attrition.
- HR:** Lowest impact at **5.06% (12 employees)**.

## 3. Demographic & Educational Insights

- Education Field:** Employees with a background in **Life Sciences (89)** and **Medical (63)** fields show the highest attrition counts.
- Age Distribution:** The workforce peaks in the **28–36 age bracket**, with the highest concentration of employees around age 32.
- Gender Balance in Attrition:**
  - Male:** 150 leavers.
  - Female:** 87 leavers.

Males represent a significantly higher portion of the attrition count compared to females.

## 4. Attrition by Age Group & Gender

- 25–34 Age Group:** This is the highest risk category for turnover, with **112 total leavers** (69 Male, 43 Female). This suggests a "career-growth" flight risk among young professionals.
- Under 25:** Shows a high percentage of attrition relative to the group size (8.44% Female, 7.59% Male).
- Over 55:** Lowest attrition risk, showing the highest stability among senior staff.

## 5. Job Satisfaction Analysis

The table below highlights satisfaction ratings (1-Low to 4-High) across key roles:

| Job Role              | High Satisfaction (Rating 4) | Total Employees |
|-----------------------|------------------------------|-----------------|
| Research Scientist    | 95                           | 292             |
| Sales Executive       | 112                          | 326             |
| Laboratory Technician | 80                           | 259             |
| Human Resources       | 13                           | 52              |

- Positive Trend:** Sales Executives and Research Scientists report the highest counts of "High Satisfaction" (Level 4).
- Area of Concern:** Across all roles, there is a significant cluster of "Level 1" (Low) satisfaction, specifically within **Sales Executives (69)** and **Laboratory Technicians (56)**.

## Strategic Recommendations:

- Targeted Retention in R&D:** Conduct "Stay Interviews" within the R&D department to identify specific pain points contributing to the 56% attrition rate.
- Early Career Engagement:** Develop mentorship programs specifically for the **25–34 age bracket** to improve long-term career pathing and reduce mid-level turnover.
- Role-Specific Satisfaction:** Investigate the low satisfaction ratings (Level 1) among Laboratory Technicians and Sales Executives to determine if the cause is compensation, work-life balance, or workload.
